

ENCORE® 100 NYLON

The first step in building a better commercial carpet is using a superior nylon. At J+J Flooring, we have produced our own solution dyed nylon since 1991 to control the color, quality and appearance retention of our carpet products.

Features & Benefits:

For carpet to be a true value, it must look as good years into the future as it does the day it is installed. It must withstand all of the abuse that an active workplace can produce. No other fiber meets these challenges as well as Encore 100, and no other fiber is backed by a stronger quality assurance package. Furthermore, the high recycled content incorporated into Encore 100 nylon provides a reduced environmental impact without compromising quality or color clarity.

- 100% Post-industrial (Pre-consumer) Recycled Content
- Full inclusion into the J&J Flooring Carpet Reclamation Program
- J+J Flooring's Encore 100 color palette is not available from any other mill or fiber producer
- With Encore 100 nylon, you can be assured that the carpet color will be consistent throughout your order

Warranties:

- Lifetime Stain Removal
- Lifetime Wear Warranty
- Lifetime Colorfastness to Light
- Lifetime Colorfastness to Atmospheric Contaminants

For complete warranty information, contact your J+J Flooring Sales Representative or call J+J Flooring's Business Development Department at 800.241.4586.
